

Highlands SD Tutoring

...

We are here to help!

WHY TUTORING?

- Tutoring consistently enhances reading skills for students who are struggling, especially when they are able to attend frequent tutoring sessions that last 30-60 minutes.
- High dosage (small group, high frequency) tutoring is one of the strongest interventions shown to increase student learning.
- Most effective tutoring programs establish strong relationships with students first. All HSD tutoring programs operate with teachers who know and care about our students.
