Not Your Idea of Manufacturing!

When you step into the doors of this company, you will quickly come to realize that the place is different than originally expected.

It is air conditioned wherever you go, floors are shining, and the atmosphere of the working environment is one that cannot be matched.

You will be working in a clean, and highly safe building. If you've ever thought of manufacturing as sweaty and miserable, those thoughts will immediately be gone once you visit Oberg!

Free Education

- No cost for the program, a virtually free education
- On average, Oberg will invest approx. \$200,000 on each apprentice (hourly compensation, bonuses, & benefits) over a four-year period while the student is completing the program
- Will be provided with materials, knowledge, training, facilities, & equipment

“Earn and Learn”

- Will receive competitive starting wages and benefits, and be eligible for pay increases every 6 months
- If the student chooses to go to school while in the program, they are offering credit reimbursement. (more details to follow)
 - Would have to be majoring in something related to your job at Oberg's. ex. Biomedical Engineering

What's the next step?

As a senior, you will have to enroll in 3 classes that Oberg requires you to take.

- Natural Resources and Production Technologies
- Engineering Design
- Geometry and Trigonometry

An aptitude test will be provided in order to officially become an apprentice. You

The company will also provide monthly job shadow opportunities during the scho

No Plans After High School?

This is a phenomenal opportunity for those that may not be attending a college or university after high school!

Whatever the reason may be, you will be **MAKING MONEY** right out of high school with this apprentice program.

Please, take the time to think of all the opportunities that this program has to offer.
