

Health

Emergency Response Services

This program is for students interested in pursuing a career, volunteer service or post-secondary education in emergency medical, law enforcement, fire or emergency management services. EMS provides training on a fully equipped on-site lab including a fire tower and fire truck.

Health Science Technology

This pre-nursing course gives ample opportunity for skill development through clinical experience in a health care setting. During this practical experience, students care for patients and perform skills under the direct supervision of a Registered Nurse. Students can also prepare for careers in Physical Therapy, Occupational Therapy and Medical Office areas.

Transportation

Automotive Technology

Automotive Technology provides instruction covering a wide range of skills for the high-tech automotive industry. This includes engines, computer diagnostics, maintenance and repair, and the opportunity to earn a PA State Inspection and Emissions Certification.

Collision Repair Technology

The program provides the skills necessary to transform a wrecked vehicle into a masterpiece. Students receive instruction with state-of-the-art equipment for replacing or repairing auto body parts. Students learn to customize vehicles with painting techniques using water borne base coats.

Diesel Technology

This program provides training covering diesel engines, as well as gasoline powered equipment and vehicles. Medium/heavy trucks and heavy equipment are part of every aspect of today's transportation, construction and manufacturing industries. Students can also obtain PA State Inspection and Emissions Certification.

Warehouse Management

This program will actively engage students in the process of receiving, storing, shipping, controlling and distributing products. Students will use conveyors, hand trucks and carts to transport materials/supplies. They will work in Forbes distribution center using technology to scan and track products.

Service Occupations

Cosmetology

This program builds skills for a variety of careers within the cosmetology industry. The course includes skills in performing procedures in areas as: hair, skin and nail care as well as salon operations. Upon completion of the required hours of instruction, students will be eligible to take the PA State Board Exam to obtain a cosmetology license.

Culinary Arts

The Culinary Arts course offers instruction in the commercial restaurant industry including: gourmet and fine dining, customer service, menu planning, cost-control, sanitation and hygiene. The curriculum provides students the opportunity to learn the complete food cycle including nutrition, ordering processes, menu design, equipment use and presentation skills.

Child Care Services

This program provides training through our ABC's Day Care facility. The course encompasses all the phases of early childhood development including physical, social, emotional and intellectual. The curriculum also includes nutrition, guidance, discipline, the value of play and science of child development.
